WE ARE DHS

DEDICATED

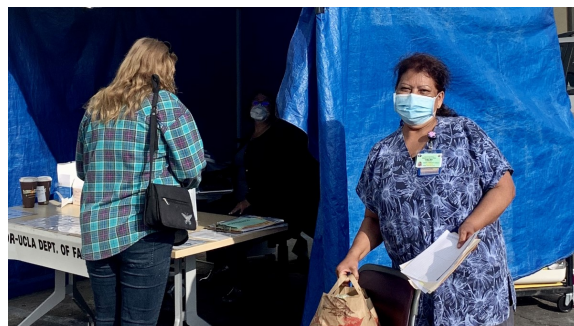

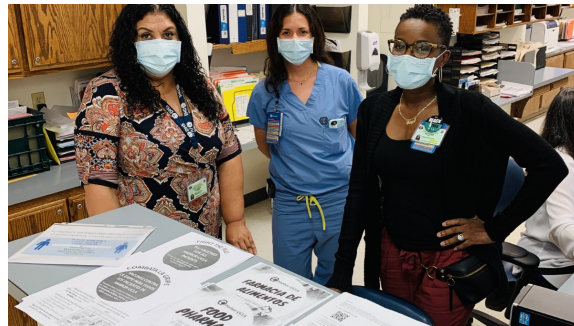

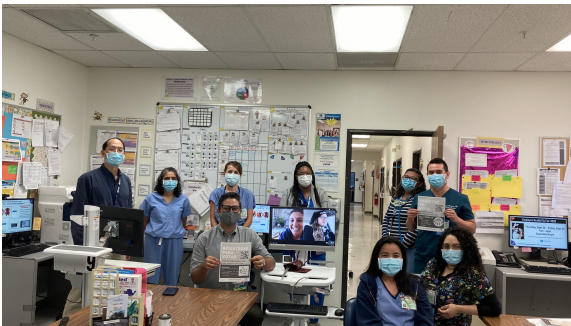

HERE TOGETHER

SAVING LIVES

This work is in alignment with our mission to provide whole person/community care for underserved and marginalized populations.

"For over 8 weeks (and counting) these interprofessional teams have worked together on PDSA cycles, collecting data and revising workflows, to confront these critical areas and improve our patients' social determinants of health -- while stewarding our resources, and without disrupting clinic workflows or compromising safety."

- Dr. Heather Bennett Schickedanz

The Harbor-UCLA Department of Family Medicine organized its Lomita Family Medicine primary care clinic teams into 3 quality improvement initiatives:

- (1) Addressing Food Insecurity
- (2) Increasing Census Awareness
- (3) Increasing Voter Registration Awareness.
